RESEARCH INTERNSHIP PROJECTS

- 1) Isolation and Biological Evaluation of Peptides and Proteins from Venomous endemic species (scorpions and snakes)
- 2) Biological evaluation of extracts of endemic plants.
- 3) Marine peptides for cosmetics
- 4) Green Chemistry applications for peptides synthesis
- 5) Interaction of self-assembled peptides with graphene for bioinks
- 6) Review of zoonotic diseases transmitted from birds to humans
- 7) Birds as indicators of microplastic pollution
- 8) A meta-analysis of songbird poaching in the Mediterranean and Middle East
- 9) Review of microplastic pollution in carnivorous mammals
- 10) Functional capacity assessment in older adults
- 11) Special Concerns of the female athlete

***Additional details on research projects can be provided upon request.
